Journal of the
International Association for Mathematical Geology
Volume 17, 1985

Editorial Board

Editor-in-Chief: C. John Mann (USA)
Deputy Editor: Robert Ehrlich (USA)
Book Review Editor: Thomas A. Jones (USA)

Associate Editors
Margaret Armstrong (France)
W. E. Bardsley (New Zealand)
Niichi Nishiwaki (Japan)

Editorial Correspondents

Marco Alfaro (Chile)
Alan C. Cook (Australia)
Josip Crnicki (Yugoslavia)
S. Rao Divi (Saudi Arabia)
Leonardo Elizalde (Ecuador)
Andrea G. Fabbri (Italy)
Adriano Heckert Gripp (Brazil)
Douglas M. Hawkins (South Africa)
Wilfried Imrich (Austria)
Li Yuwei (China)
Luis I. Malagrida (Spain)
M. A. Olorunniwo (Nigeria)
Gerardo M. E. Perillo (Argentina)
Fadhil N. Sadooni (Iraq)
A. K. Saha (India)
Wolfgang Scherer (Venezuela)
Andrew B. Vistelius (USSR)
Vassil T. Vuchev (Bulgaria)

Officers and Council Members of the IAMG

President: John C. Davis (USA)
Past President: E. H. Timothy Whitten (USA)
Vice President: Paul Switzer (USA)
Secretary General: Richard B. McCammon (USA)
Treasurers: Michael Ed. Hohn (USA)
Vaclav Nemec (Czechoslovakia)
Editor-in-Chief, Journal: C. John Mann (USA)
Editors-in-Chief, Computers and Geosciences:
John M. Cubitt (UK)
Daniel F. Merriam (USA)

IGC Councillor
Harry M. Parker (USA)

Council Members:
Isobel Clark (UK)
John M. Cubitt (UK)
Dan Gill (Israel)
Alain Marechal (France)
Richard Sinding-Larsen (Norway)
Gordon Williams (Canada)

Journal of the International Association for Mathematical Geology is published monthly except March, June, September, and December for the International Association for Mathematical Geology by Plenum Publishing Corporation, 233 Spring Street, New York, N.Y. 10013. In 1985, Volume 17 (8 issues) will be published. Subscription orders should be addressed to the publisher. *Journal of the International Association for Mathematical Geology* is abstracted or indexed in Applied Mechanics Reviews, Chemical Abstracts, Computer and Information Systems Abstracts Journal, Current Contents, Geocom Bulletin, Geotitles Weekly, Mathematical Reviews, Petroleum Abstracts, Referativnyi Zhurnal, Science Citation Index, and Zentralblatt für Mathematik. © 1985 Plenum Publishing Corporation. *Journal of the International Association for Mathematical Geology* participates in the program of Copyright Clearance Center (CCC) Transactional Reporting Service. The appearance of a code line at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use. However, this consent is given on the condition that the copier pay the flat fee of $4.50 per copy per article (no additional per page fees) directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970, for all copying not explicitly permitted by Sections 107 or 108 of the U.S. Copyright Law. The CCC is a nonprofit clearinghouse for the payment of photocopying fees by libraries and other users registered with the CCC. Therefore, this consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, nor to the reprinting of figures, tables, and text excerpts. 0020-5958/85 $4.50

Subscription rates:
Volume 17, 1985 (8 issues) $205.00 (outside the U.S., $230.00).
Volume 18, 1986 (8 issues) $225.00 (outside the U.S., $252.00).

Second-class postage paid at New York, N.Y., and at additional mailing offices. Postmaster: Send address changes to *Journal of the International Association for Mathematical Geology,* Plenum Publishing Corporation, 233 Spring Street, New York, N.Y. 10013.

ɔournal of the
nternational Association for
Mathematical Geology

ɔolume 17, Number 1, January 1985

ɔontents

'he Deterministic Side of Geostatistics 1
A. G. Journel

'ater Penetration Through Fractured Rocks: Test of a Tridimensional Percolation Description 17
Stephan Wilke, Etienne Guyon, and Ghislain de Marsily

tatistical Properties of the Number of Runs of Matches Between Two Random Stratigraphic Sections 29
J. Vrbik

pectral-Type Simulation of Spatially Correlated Fracture Set Properties 41
Stanley M. Miller and Leon E. Borgman

'alculation of the Volume of an Alluvial Fan 53
P. M. Nanninga and R. J. Wasson

'he Generation of Multidimensional Autoregressive Series by the Herring-bone Method 67
W. E. Sharp and Leo A. Aroian

wo-Dimensional Simulation by Turning Bands 81
Peter I. Brooker

RRATUM 91

NNOUNCEMENT 93

Journal of the International Association for Mathematical Geology

Volume 17, Number 2, February 1985

Contents

Prediction of Oil or Gas Pool Sizes When Discovery Record is Available 95
P. J. Lee and P. C. C. Wang

A Numerical Compaction Model of Overpressuring in Shales 115
L. A. Keith and J. D. Rimstidt

Change of Support for Diffusion-Type Random Functions 137
G. Matheron

Probabilistic Aspects of Micropaleontologic Assemblage Zones 167
Isamu Hattori

Spatial Analysis of Two-Dimensional Orientation Data 177
N. I. Fisher, J. F. Huntington, D. R. Jackett, M. E. Willcox, and J. W. Creasey

Minimum-Variance Unbiased Quadratic Estimation of Covariances of Regionalized Variables 195
Peter K. Kitanidis

SHORT NOTE

A Confidence Region in a Ternary Diagram from Point Counts 209
G. S. Watson and Ha Nguyen

EDITOR'S NOTE 215

Journal of the International Association for Mathematical Geology

Volume 17, Number 3, April 1985

Contents

EDITOR'S NOTE 219

Treatment of Earthquake Ground Motion Using Regionalized Variables 221
James R. Carr and Charles E. Glass

Recognition of Mineralized Belts and Lithologic Patterns in the Silver City-South Mountain Region, Idaho, in Terms of Geochemical Reconnaissance Data 243
Yuwei Li

A Model for the Statistical Distribution of Microlithotypes in Coal 267
Murray A. Cameron and John W. Hunt

Error Bounds in Cascading Regressions 287
Michael R. Karlinger and Brent M. Troutman

A Model of Regional Fluid Flow: Sand Concentration Factors and Effective Lateral and Vertical Permeabilities 297
W. H. Glezen and I. Lerche

Univariate and Multivariate Stochastic Modeling of the Chemical Composition of Iron Ores in Northern Goa, India 317
B. K. Sahu and P. S. Raiker

SHORT NOTE

Likely Change of the Average Grade of a Deposit After New Drilling 327
Michel David and Didier Crozel

Journal of the International Association for Mathematical Geology

Volume 17, Number 4, May 1985

Contents

Think Deep: Computer Methods and the Subsurface 333
John C. Davis

Lognormal Field Size Distributions as a Consequence of Economic Truncation 335
E. D. Attanasi and L. J. Drew

Oil and Gas in Offshore Tracts: Bias in Estimates of Reserves 353
L. A. Thomsen and Matt Joggerst

Comparative Study of Aggregations Under Different Dependency Assumptions for Assessment of Undiscovered Recoverable Oil Resources in the World 367
Robert A. Crovelli

Changes in Drilling Density and Discovery Rates Through Time 375
David R. Collins

Exploration in the Minnelusa Sandstone Using a Digital Well Log Database 395
Daniel E. Shier

Spatial Analysis of Extension Fracture Systems: A Process Modeling Approach 403
Colin C. Ferguson

Resolving Controls on Epeiric Sedimentation Using Trend Surface Analysis 427
W. L. Watney

Computer Mapping of Seismic Reflectors in the Coastal Region of the National Petroleum Reserve in Alaska 455
Daniel M. Tetzlaff and John W. Harbaugh

ABSTRACTS 481

Journal of the International Association for Mathematical Geology

Volume 17, Number 5, July 1985

Contents

Recursive Parameter Estimation with Applications in Earth Sciences 489
George Christakos

Minimum Norm Quadratic Estimation of Components of Spatial Covariance 517
R. J. Marshall and K. V. Mardia

An Application of Cokriging for Estimation of Tripartite Earthquake Response Spectra 527
James R. Carr and Phyllis G. McCallister

Basic Geometrical Models in Geology: Werner's Topological Model 547
Yu. S. Salin

Fitting Variogram Models by Weighted Least Squares 563
Noel Cressie

BOOK REVIEWS 587

Journal of the International Association for Mathematical Geology

Volume 17, Number 6, August 1985

Contents

Multivariate Morphometrics and Analysis of Shape 591
Richard A. Reyment

Parametric Cubic Splines and Geologic Shape Descriptions 611
David G. Evans, Peter N. Schweitzer, and Martin S. Hanna

The Bi-Gaussian Approach: A Simple Method for Recovery Estimation 625
Denis Marcotte and Michel David

BOOK REVIEW 645

ASSOCIATION ANNOUNCEMENTS

The Fifth General Assembly of the International Association for Mathematical Geology 647

Statutes of the International Association for Mathematical Geology 656

By-Laws 660

Officers and Council of the IAMG (1984 to 1989) and Their Current Addresses 663

urnal of the
ternational Association for
athematical Geology

ume 17, Number 7, October 1985

tents

ial Autocorrelation as a Criterion for Retaining Factors in Ordinations of Geographic Data 665
Daniel Wartenberg

Budgeting Problem of a Searching Firm 683
D. J. Jankowski, K. C. Brown, M. A. Kochanski, and F. T. Sparrow

n Are Relative Variograms Useful in Geostatistics? 693
Noel Cressie

nteractive Global Optimization Algorithm for Geological Problems 703
Paul Schiffelbein

Automated Method for Measuring Thicknesses of Layered Sediments 729
Joel Michaelsen

ard an Expert System for Identification of Minerals in Thin Section 743
Jeremy West

le/Multiple Input–Single Output Transfer Function with Noise Models for Constituents of Iron Ores of Northern Goa, India 755
P. S. Raiker and B. K. Sahu

RT NOTE
strapping Correlated Data 769
Andrew R. Solow

K REVIEWS 777
